

Sreenethra Eye Care Website - V0/Cursor Development Prompt

Project Overview

Create a multi-page healthcare website for **Sreenethra Eye Care** using the provided HTML template structure, content file, and brand assets.

Brand Guidelines

- **Primary Colors:** Use the existing green and light green brand colors from Sreenethra's current website
- **Design System:** Follow the exact design patterns, layouts, and styling from the provided HTML template
- **Content:** Use ONLY the content provided in the content.md file - no additional information should be added

Source Materials Provided

1. **HTML Template Files:** Complete set of HTML pages with existing structure and styling
2. **Content File:** content.md with all text content, doctor profiles, department information
3. **Brand Assets:** Photoshop and Illustrator files containing logos, colors, and design elements
4. **Reference Template:** Healthcare Institution 128 template structure as foundation

Development Requirements

Technical Stack

- **Framework:** React with Next.js
- **Styling:** Tailwind CSS (maintain template's existing design patterns)
- **Responsive:** Mobile-first approach matching template breakpoints

Page Structure (as per HTML template)

Create the following pages maintaining the exact layout structure from the provided HTML files:

1. **Homepage** (/)
2. **About Us** (/about)
3. **Departments** (/departments)
4. **Our Doctors** (/doctors)
5. **Services** (/services)
6. **Contact** (/contact)

7. **Book Appointment** (/book-appointment)

Content Mapping Instructions

Use ONLY the following content from the provided content.md file:

Hospital Information:

- Name: Sreenethra Eye Care
- Location: Bakery Junction, Nandavanam Road, Thiruvananthapuram, Kerala
- Main Phone: 04712 322 322
- Mobile: 8590 604 204
- Care Coordinator: 85906 04204

Branch Locations:

- Thiruvananthapuram (Main)
- Kottarakkara
- Kattakkada
- Neyyattinkara
- Chirayinkeezhu

Departments (9 total):

1. Cataract
2. Cornea & Refractive Surgery
3. Retina and Vitreous
4. Glaucoma
5. Paediatric Ophthalmology and Strabismus
6. Uvea
7. Neuro-Ophthalmology
8. Orbit, Oculoplasty, Prosthetics and Oncology
9. General Ophthalmology

Senior Consultant Doctors:

- Dr. Ashad Sivaraman (Director, Vitreoretinal Surgery)
- Dr. Swapna Nair (Head - Cornea, Cataract & Refractive Surgery)
- Dr. K. Mahadevan (Senior Consultant - Vitreoretinal Surgery)
- Dr. Harshali Yadav (Senior Consultant - Vitreoretinal, Uvea, Neuro-ophthalmology)

- Dr. Anoop Sivaraman (Senior Consultant - Vitreoretinal Surgery)
- Dr. Anila George (Head - Paediatric Ophthalmology & Adult Strabismus)
- Dr. Arvin Ponnat (Senior Consultant - Glaucoma)

Consultant Doctors:

- Dr. Pinki L. P., Dr. Aiswaria P., Dr. Rajalekshmi S., Dr. Krishna G. S., Dr. Shabna A, Dr. Malavika Jayakumar

Strict Content Guidelines

- **NO additional content** beyond what's in content.md
- **NO placeholder text** or lorem ipsum
- **NO stock medical content**
- **NO invented statistics** or achievements not mentioned in the content file
- Use exact doctor names, qualifications, and contact numbers as provided
- Use exact department descriptions and procedures as listed
- Use exact equipment and technology lists as specified
- Use exact hospital statistics and achievements as mentioned

Design Implementation

- **Colors:** Extract and implement the green/light green color scheme from provided brand files
- **Layout:** Replicate the exact structure, spacing, and component layouts from HTML template
- **Typography:** Match the font hierarchy and styling from the template
- **Components:** Create reusable React components that match template's design patterns
- **Animations:** Implement any animations/transitions present in the original template
- **Forms:** Recreate contact forms and appointment booking with the same styling and functionality

Responsive Behavior

- Follow the exact breakpoints and responsive behavior from the HTML template
- Maintain the same mobile navigation, grid layouts, and component stacking
- Ensure all interactive elements work as in the original template

Functionality Requirements

- **Navigation:** Implement smooth scrolling and active states as in template
- **Forms:** Contact forms with validation (no backend integration needed)
- **Phone Links:** Click-to-call functionality for all phone numbers
- **Image Placeholders:** Use professional medical/eye-care themed placeholder images

- **SEO:** Proper meta tags and structured data

Development Instructions for Cursor

When using this in Cursor IDE:

1. Create a new Next.js project with Tailwind CSS
2. Analyze the provided HTML template files to understand the exact structure
3. Extract color codes from the brand assets (PS/AI files)
4. Map content from content.md to the appropriate page sections
5. Create component structure that matches the template's layout hierarchy
6. Implement responsive grid systems exactly as shown in HTML template
7. Style components to match the visual design while using Tailwind classes

File Organization

```
src/  
  components/  
    Header.tsx  
    Footer.tsx  
    DepartmentCard.tsx  
    DoctorCard.tsx  
    ContactForm.tsx  
    etc.  
  pages/  
    index.tsx (Homepage)  
    about.tsx  
    departments.tsx  
    doctors.tsx  
    services.tsx  
    contact.tsx  
    book-appointment.tsx  
  styles/  
    globals.css  
  data/  
    content.ts (extracted from content.md)
```

Final Notes

- This is a conversion project, not a new design project
- Maintain the professional healthcare aesthetic of the template
- Ensure all content accurately represents Sreenethra Eye Care's actual services
- Do not add any medical advice, treatment information, or health claims beyond what's provided

- Focus on creating a pixel-perfect recreation of the template with the provided content
